ILSI Europe

Founded in 1986, ILSI Europe fosters collaboration among the best scientists from industry, academia and the public sector to provide evidence-based scientific solutions and to pave the way forward in nutrition, food safety, consumer behaviour and sustainability. To deliver science of the highest quality and integrity, scientists collaborate and share their unique expertise in expert groups, workshops, symposia and resulting publications. Whereas ILSI Europe's activities are mainly funded by its member companies, academic experts involved in our activities contribute through their voluntary work. In addition, ILSI Europe receives funding from the European Union-funded projects they partner with and projects initiated by Member States' national authorities.

Our scientific portfolio is organised around 6 overarching themes: food safety; exposure and intake assessment; biomarkers and functional effect measurements; gut microbiota and health; nutrition, development and healthy ageing; consumer trust and sustainability. This mapping ensures a multidisciplinary approach and cross-fertilisation in our activities.

Our Vision

We build multi-stakeholder science-based solutions for a sustainable and healthier world.

Our Mission

- We foster collaboration between relevant stakeholders.
- We identify existing and emerging challenges in food, nutrition and health and facilitate proactive practical solutions.
- We communicate and disseminate our scientific output widely.
- Our way of working is designed to deliver science of the highest quality and integrity.

All ILSI Europe activities are conducted under the supervision of ILSI Europe's **Scientific Advisory Committee**. ILSI Europe's bylaws mandate that the Scientific Advisory Committee must be composed of a maximum of 20 experts with more than 50% coming from the public sector. The Scientific Advisory Committee plays an important role in reviewing all activities with respect to their scientific quality, validity and coherence with ILSI Europe's programme.

The Scientific Advisory Committee also provides scientific advice to the **Board of Directors**. The Board of Directors must be composed of at least 50% public sector scientists; the remaining directors represent ILSI Europe's member companies.
