LIST OF POSTER ABSTRACTS
ALPHATICALLY BY PRESENTING AUTHOR / SUBSTITUTE

Alessandro Chiodini/ILSI Europe, BE - Function Food Task Force - Assessing evidence-based nutrition to help functional food science moving further
Ileana Baldi/University of Padua, IT - Framing the problem of proof within seamless designs
Raquel Barbosa I/Portuguese Catholic University, PT - Selection of potentially probiotic strains of native flora from fruits
Raquel Barbosa II/Portuguese Catholic University, PT - Incorporation of L. paracasei in low pH fruit juices and its storage stability as free cells or encapsulated in alginate based microcapsules
Ali Batu/Tunceli University, TR - Processing of Hawthorn and Cranberry Fruits in Value Added Food Stuffs
Diana Chrpová/ Institute of Chemical Technology, CZ - The effect of growth conditions on nutritionally significant components of parsley leaves (Petroselinum crispum)
Laura Contor I/ILSI Europe, BE - EURRECA: development of tools to improve the alignment of micronutrient recommendations
Laura Contor II/ILSI Europe, BE - Development of micronutrient requirements – the EURRECA experience
Teresa da Costa/University of Brasil, BR - Association of moderate coffee intake and type-2 diabetes among Brazilians
Theo de Kok/Maastricht University, NL - Molecular pathways involved in the antioxidant action of blueberry juice and blueberry phytochemicals: a genomics approach
Kerstin Dressel/Dialogik, DE - Food and Health Research in Europe (FAHRE) - Enhanced Cooperation in Food and Health with a view to Strengthening the European Research Area
Laura Fernandez/EUFIC, BE - Consumers and health claims - perceptions, attitudes, understanding, and purchasing behaviour
John Flanagan/Naturex, ES - Beneficial effects of maca (Lepidium meyenii Walp) supplementation on sexual desire
Sofia Forssten/Danisco Sweeteners, FI - Changes in satiety hormone concentrations in rats in response to lactic acid bacteria
Dorothée Goffin/Technical University of Liège, BE - A method inspired by nature for the production of original and purified prebiotic preparations containing isomaltooligosaccharides and gluconic acid
Ligia Guerrero/Universitat Rovira i Virgilia, ES - Effect of different polyphenols extracts on lipid synthesis in human HepG2 cells
Jason Halford/University of Liverpool - Satiety Control through Food Structures made by Novel Processing: The SATIN (SATiety Innovation) Project
Jeljer Hoekstra/National Institute for Public Health & the Environment (RIVM), NL - Health benefits and costs of functional foods with phytosterols/-stanols in addition to statins in the prevention of cardiovascular disease
Alexa Hoyland/Kellogg Europe, UK – The measurement of diet-induced changes in cognition: methodological aspects
Lena Jönsson/ILSI Europe, BE (on behalf of the ILSI Europe Nutrition & Mental Performance Task Force) - Assessing the impact of nutrition on children's cognition
Kari Tvete Inngjerdingen/University of Oslo, NO - Bioactive polysaccharides from wild and cultivated Vernonia kotschyana
Gun-Hee Kim I/Duksung Women's University, KR - Butanol fraction of Rubus coreanus suppression of adipogenesis is accompanied by activation of Wnt/β-catenin signalling
Gun-Hee Kim II/Duksung Women's University, KR - Providing on Foods Functionality Information for Improvement of Consumers' Understanding
Gokcen Komen/Izmir Institute of Technology, TR - Recent developments in formulating gluten-free food products
Assia Kovatcheva/Coca-Cola Europe, BE - Recommendations for long-term nutritional intervention studies on cognitive function
Iris Kunz/DSM, CH (on behalf of the authors) - Nutrigenomics in human intervention studies: Current status, lessons learned and future perspectives
Sampo Lahtinen/Danisco Sweeteners, FI - Bifidobacterium lactis Bl-04™ supplementation results in beneficial clinical effects in healthy physically active individuals: a randomised controlled trial
Catherine Lefranc-Millot/Roquette Frères, FR - Nomadic fibres for diet enrichment: a potential preventive tool for weight management
Bohdan Luhovyy/Mount Saint Vincent University, CA - The Short-Term Health Effects Associated With Cooked Navy Bean Powder
Anna Lyra/Danisco Sweeteners, FI - Bifidobacterium sp. B420 treatment protects from non-steroidal anti-inflammatory drug induced gastrointestinal permeability increase in a rat model
Fabienne Malherbe/ILSI Europe, BE (on behalf of the authors) - Predicting consumer acceptance of emerging food technologies
Claudine Manach/INRA, FR - Successful application of MS-based metabolomics to identify biomarkers of food intake in a cohort study: The example of Citrus in the SU.VI.MAX2 cohort
Subhadra Mandalika/College of Home Science, IN - Effect of fenugreek seeds on the reproductive health of albino Wistar rats
Agnès Meheust I/ILSI Europe, BE (on behalf of the ILSI Europe Prebiotics Task Force) - Understanding the prebiotics metabolic and health effects
Agnès Meheust II/ILSI Europe, BE (on behalf of the ILSI Europe Probiotics Task Force) - Exploring the interactions between probiotics and health
Marjolaine Meyer/Naturex, ES - Beneficial effects of a lemon balm (Melissa officinalis L.) extract on alleviating symptoms of stress and anxiety
Christine Morand/Lactalis, FR - Hesperidin is causally linked to the vascular protective effects of orange juice – Implication of nutrigenomic effects
Elizabeth Neale/University of Wollongong, AU - Perceptions of long chain omega-3 fortified foods and supplements within participants of a clinical weight loss trial and University staff members
Deborah Nolan/University of Wollongong, AU - An evaluation of consumer perceptions of functional dairy products using concepts from the theory of planned behaviour
Alice Nongonierma/University of Limerick, IE - Whey-derived peptides can promote insulin secretion in a clonal pancreatic beta-cell line
Kaisa Olli/Danisco Sweeteners, FI - The effects of polydextrose on satiety in humans
Begoña Olmedilla-Alonso I/Institute of Food Science, Technology and Nutrition, ES - Description and postprandial effect in type 2 diabetics of improved Spanish beans (Almonga and Curruquina): a stimulus for a healthy diet
Begoña Olmedilla-Alonso II/Institute of Food Science, Technology and Nutrition, ES - Lutein enriched milk juice beverage intake: assessment of the effect on serum, macular pigment and visual sensitivity in an eight months placebo controlled study
Arthur Ouwehand/Danisco Sweeteners, FI - A probiotic combination to reduce antibiotic associated diarrhoea and other side effects of antibiotic-use; a dose-response study
Heli Putaala/Danisco Biactives, FI - Polydextrose metabolome from simulated colonic fermentation regulates cell cycle, apoptosis-, and energy-metabolism related genes, as well as reduces proliferation and induces apoptosis in colon cancer cells
Ana Ramalho Ribeiro/University of Algarve, PT - Fish as Functional Food
Elke Richling/University of Kaiserslautern, DE - Encapsulation of bilberry anthocyanins-modulation of gastrointestinal release and antioxidative efficiency
Iva Roubičková/Institute of Chemical Technology, CZ - Possibilities to frying fats and oils stabilization against oxidative rancidity
Markhu Saarinen/Danisco Sweeteners, FI - Probiotic cheese containing Lactobacillus rhamnosus HN001 and Lactobacillus acidophilus NCFM® enhances innate immunity and decreases faecal Clostridium difficile levels in elderly subjects
Maria Luisa Serralheiro/University of Lisboa, PT - Gastrointestinal simulated digestion of the Cynara cardunculus (Artichoke) and Fraxinus angustifolia (Ash) infusions
Sara Silva/Portuguese Catholic University, PT - Characterization of antimicrobial properties of hydroethanolic extracts of vaccinium corymbosum berries and leaves
Igor Spiroski/Institute of Public Health, Macedonia, MK - Products with nutritional and health claims – Consumer’s attitudes and market expectations in the Republic of Macedonia
Barbara Stewart-Knox/University of Ulster, IE - Health Risk versus Health Benefit and Consumer Uptake of Functional Foods
Douglas Weed/DLW Consulting Services LLC, US - The Quality of Reviews on Sugar-Sweetened Beverages
